Introduction

The **Geerinckx family** are longstanding generational iconic Belgian pigeon fanciers. Their birds thrive on the difficult National races. I first encountered the Geerinckx family pigeons when I visited the Premier stud in the UK. I was impressed by their strength and complexity of eye sign. Their most iconic base pigeon is Gladiator, a Olympiade champion, himself bred from two ace pigeons. Pencil cock 684 is a clone of the Gladiator himself and is a direct grandson on the father's side. This pedigree incorporates many of Geerinckx baseline super breeders and National champions. The Iron Lady lines for me have been particularly successful. And shine on the toughest of days. For the Geerinckx aficionados, they will understand the unique depth of this pedigree. This is a stunning cock bird in the hand and a privilege to have in my loft. I sell this pigeons with a great sense of loss, as it is irreplaceable. I have integrated the key Geerinckx lines into my National winning pigeons. This is your chance to do the same. You will understand your good fortune as soon as you handle this pigeon. It is my opinion that these key Geerinckx bird will no longer be imported to Australia. Gladiator Acy 684 is bred by the highly regarded Beverdam family, hence carries an NL ring.
